

# Stoner Street Processing | 2019

---

This statement is to insure the understanding that Stoner Street Processing only sources Cannabis that has been grown using clean processes without the aid of pesticides. This is accomplished by maintaining a sterile environment for healthy soil and strong plants. This enables the plants to use the natural compounds available in the soil to boost their immune system so they can fend off disease, insects, and mold. We hold quality in the highest regard so from start to finish we insure only the best is processed, packaged, and made available to our customers.
