

PHOENIX CANNABIS COMPANY

PESTICIDE DISCLOSURE STATEMENT

Phoenix Cannabis Company (aka Silica Phoenix) is dedicated to providing the most natural flower we can. We use only OMRI (Organic Materials Review Institute) products on our plants and **only when absolutely necessary**. We believe in transparency and stand behind our OMRI pest policy and therefore list all products on the labels of each and every package that leaves our facility as not everyone has access to a digital version online.

Pests are naturally found in any environment and we have adopted the philosophy to work with nature, not against it. We do not need to obliterate pests, but only keep them from getting out of control. Taking this philosophy and applying to our growing environment means utilizing a regimen that focuses on cleanliness, OMRI listed products, beneficial bugs and beneficial bacteria. Our greenhouses are scrubbed top to bottom between each grow, including: fans, filters, lights, walls, floors, trays, pots, nutrient tanks and anything else that is utilized during our grow cycles.

When we need to use a pest control product, only the following products might be used (but not always and not all of them):

NUKE EM – Nuke Em is citric acid and is OMRI listed for organic production. NUKE EM uses fast acting, non toxic, food grade ingredients and is proven to be safe around pets, people and the environment. Nuke Em's statement: *"We will continue to make sure that our ingredient suppliers are held to the highest standards by having each Nuke Em batch laboratory tested before it is bottled. This testing verifies that Nuke Em is free of 59 adverse chemicals and chemical compounds along with yeast, bacteria and mold. To identify which chemicals we test for, simply click here and look at the lab tests."*

Green Cure – Green Cure is potassium bicarbonate and is OMRI listed for organic production. Green Cure is a broad spectrum, contact foliar fungicide that controls a variety of diseases on terrestrial and indoor woody and herbaceous ornamental, greenhouse, garden plants and turf. Green Cure has been proven to be safe around pets, people and the environment.

SNS 209 (Sierra Natural Science) – SNS 209 is Rosemary oil and is OMRI listed for organic production. SNS 209 uses fast acting, non toxic, food grade ingredients and is proven to be safe around pets, people and the environment.

Nematodes

Beneficial Bacteria - Mycorrhizae
